# WHY SHOULD YOU SHIP INSTEAD OF DRIVE?

Driving presents a number of hazards, especially during the winter months. Not only do you run the risk of an accident, but you also have to face traffic along the way.

Skip the headaches associated with driving. Fly, instead. We will deliver your car to your destination, anywhere in the U.S.

If you are still not convinced, here are some additional reasons why shipping is the better option:

- Saves you money on driving expenses (lodging, gas, and food)
- Spares the car wear and tear from added miles.
- Saves you unnecessary time and energy.
- Makes for a stress-free experience.

With a busy schedule, auto transport makes for the easier option. You do not have to worry about spending hours road tripping across the country. There is a better solution.

# Cost To Ship A Car

Car transport rates are based on many variables. These prices are not fixed expenses. It is important to understand what goes into the price of your auto transport quote.

Here are the factors that could affect a car transport rate:

- Vehicle model
- Distance/location
- Proximity to main route
- Delivery method: open vs. enclosed
- Vehicle condition: operable vs. inoperable
- Time of year (demand)
- Economy
- Shipping options: economic, priority, guaranteed

Before booking, you should consider your budget along with the services you need. Services that may cost more include: guaranteed shipping, top-loading, and enclosed auto transport.

# What Services Are Offered?

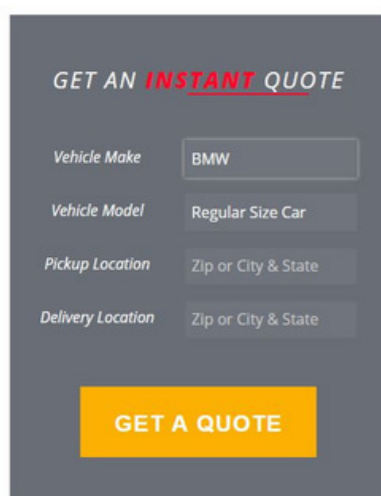

There are many services that National Dispatch offers that can meet your needs. Here are a few of the services you might find helpful:

- **Door-to-Door Transport:** This is the preferred method of transport over terminal transport, because the driver will come directly to you. The process is easy, and convenience is a plus.
- **Open Auto Transport:** Cars are generally shipped using an open-air carrier. The vehicle will be placed on a transport truck with up to eight other cars.
- **Enclosed Auto Transport:** Owners of luxury, exotic, and classic cars tend to ship their vehicles using an enclosed trailer for added protection.
- **Inoperable Vehicle Transport:** If the vehicle does not run, special equipment must be used to get the vehicle on and off the transport truck. This is no problem for National Dispatch.

# Preparing For Auto Transport

You want to make sure everything is taken care of properly before shipping your car so that transport goes smoothly. Here are a few preparation steps to get your car ready for the trip:

- Wash the exterior of the car.
- Complete a visual inspection, noting any dents, scratches, discolorations, or paint chips.
- Complete any necessary car maintenance, including: check fluids and battery, make sure tire pressure is optimal, and empty gas tank to 1/4 full.
- Secure or remove parts from the car's exterior (luggage/bike racks, retracting antenna)
- Remove all personal items from the car. They add extra weight to the car. Plus, they could roll around and cause damage.
- Deactivate all parking passes or toll tags.
- Prepare special handling instructions for the driver.

# Moving Tips

Moving is exciting, because it presents many new life opportunities. However, the process can also be extremely stressful. Below are a few ways that you can reduce the stress associated with a big move:

- **Be positive.** When you remain optimistic, there's no room for stress.
- **Stay organized.** This means throwing away items you do not need or want before the move. It is one less belonging that you will have to carry to your new home or office. It also means shipping belongings in labeled boxes so that you can find everything easily.
- **Plan ahead.** Do not wait until the last minute to do everything. This includes booking auto transport. Depending on your location and shipping options, shipping your car could take a few days to a week or more to complete.
- **Request help.** Get help from friends and family. Also, consider getting help from moving and auto transport companies. You have no idea how much time you will save.
